

Ideation Phase

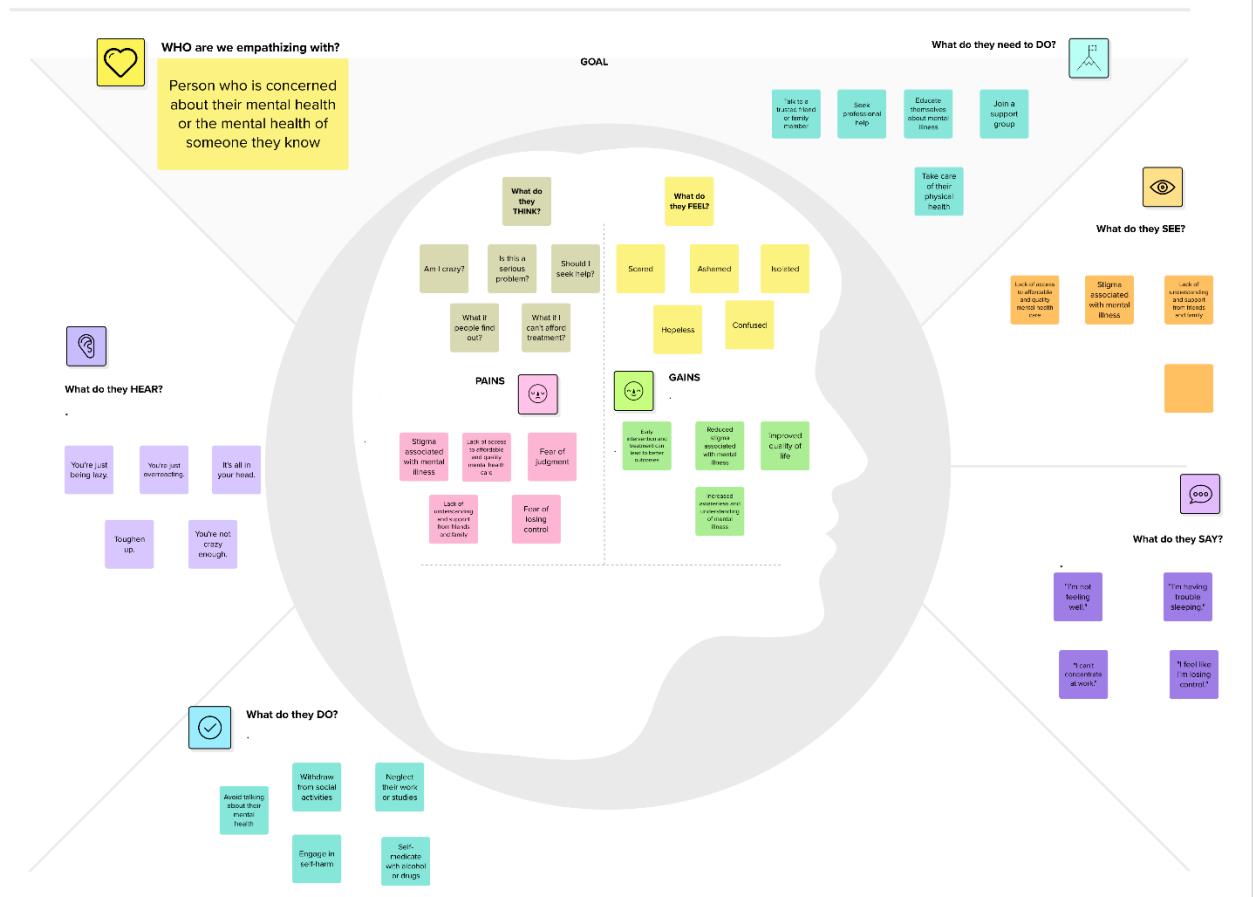

Empathize & Discover

Date	03 November 2023
Team ID	592207
Project Name	Predicting Mental Health Illness of Working Professionals Using Machine Learning
Maximum Marks	4 Marks

Empathy Map Canvas:

The main purpose of the Mental Health Prediction system is to predict whether a person needs to seek Mental health treatment or not based on inputs provided by them. The system can be used by individuals to self-assess their mental health, or by healthcare professionals to assess their patients.
